## **James L. Gallogly to Receive Prestigious 2016 SCI Chemical Industry Medal**

*Award to be presented in New York City on March 8, 2016*

**PHILADELPHIA—January 14, 2016—**The Society of Chemical Industry, America Section (SCI America), announced today that the 2016 SCI Chemical Industry Medal will be presented to James L. Gallogly, retired chief executive officer of LyondellBasell and a current director of DuPont. He will receive the medal at a dinner in his honor on March 8, 2016, at the Plaza Hotel in New York.

The SCI Chemical Industry Medal honors an individual whose leadership, commitment and contributions have been responsible for substantial progress and performance of the chemical industry. In addition to being an active guiding force in the management of their company during periods of expansion, challenging conditions, or substantial redirection, recipients are known for service rendered to the industry as a whole.

James L. Gallogly was named CEO of LyondellBasell in 2009 at a time when the company's future was uncertain. He ably guided the company and successfully repositioning it as an industry leader.

In his nearly 30 year professional tenure building up to his leadership of LyondellBasell, Gallogly's experience and accomplishments speak for themselves. In his current role as a director of DuPont, he continues to contribute to the betterment of industry as a guiding force, aptly applying the lessons, experience, and leadership perspective of a successful career.

"Jim Gallogly has long been an example of great leadership, well before he took a struggling company and led it to robust profitability in record time," said Michael Graff, chair of SCI America. "Jim's accomplished career is testament to his intuitive and no-nonsense approach to leadership, and notably punctuated by his remarkable success in rebuilding LyondellBasell into one of the safest, most well run refining and chemical companies in the world. His lifelong commitment to our industry and record of accomplishment truly exemplify the character and achievement recognized by the SCI Chemical Industry Medal."

### **About James L. Gallogly**

Before joining LyondellBasell, Gallogly spent 29 years with Phillips, ChevronPhillips, and ConocoPhillips. At these affiliated companies he worked in both the petroleum and chemical businesses, acquiring increasing responsibilities and enjoying considerable success. At the time he left ConocoPhillips he was executive vice president for exploration and production. Prior to that he was executive vice president for

refining, marketing, and transportation, and from 2000 to 2006 he served as the founding CEO of ChevronPhillips Chemical Company – a Phillips-Chevron joint venture.

Gallogly recently served as vice chairman of the board of the American Chemistry Council. He is also a member of the board of DuPont, the University of Oklahoma Gallogly College of Engineering Board of Visitors, the University of Colorado Engineering Advisory Council, and the University Cancer Foundation Board of Visitors at the University of Texas M. D. Anderson Cancer Center.

Gallogly received a BA degree from the University of Colorado at Colorado Springs in 1974 and a law degree from the University of Oklahoma in 1977. He completed the Advanced Executive Program at the J. L. Kellogg Graduate School of Management at Northwestern University in 1998.

### **About the Chemical Industry Medal**

The Chemical Industry Medal has been awarded by SCI America for more than 85 years. Presentation is made annually to a recipient selected by the Executive Committee of the America Section of the SCI. The Chemical Industry Medal is a testimonial to men and women whose leadership, foresight and contributions to applied chemistry have been, to a considerable degree, responsible for the growth of that industry. The medal has attained distinction by reason of the outstanding achievements and caliber of those who have been honored. Past recipients include Sunil Kumar, Andrew N. Liveris, David N. Weidman, J Brian Ferguson, Michael E. Campbell and Jeffrey M. Lipton.

### **About SCI**

SCI America, launched in 1894, is part of the Society of Chemical Industry's international organization. It provides a unique networking forum for chemical industry leaders, industrial scientists and technologists to exchange new business ideas and best practices. It celebrates achievement to promote public awareness of the contributions of industrial chemistry and inspire students to enter technical careers.

SCI America section also offers its members the opportunity to become part of an international network of industry thought leaders and researchers. Through specialized conferences, e-events, and publications, it helps foster best practices in fields as diverse as fine and commodity chemicals, food, pharmaceuticals, biotechnology, agriculture, and environmental protection. For more information, visit SCI America's website: [www.sci-america.org](http://www.sci-america.org).

SCI America events are managed by Chemical Heritage Foundation: [www.chemheritage.org](http://www.chemheritage.org).
